Installation Guide

This is a quick guide on installation, and updating.

1.1 Plugin Installation

To install WooCommerce Product plugin you must have a working and latest version of WordPress and WooCommerce plugin already installed. For information on installing the WordPress, please see the [WordPress Codex - Installing WordPress](#). For installing the WooCommerce and configure the shop please visit the following link [WooThemes - Installing WooCommerce](#).

Now the next step is the Extendons Ajax Product Filter installation. In the full .ZIP archive you have downloaded from [Codecanyon.net](#) you will find a file called `extendon_ajax_layered_navigation.zip`. This file is the installable .ZIP archive you can install via WordPress.

Now is time to install Extendons Ajax Product Filter, please read these steps carefully.

Installing from WordPress

Follow the steps bellow to install from WordPress Admin Dashboard

- Navigate to Plugins
- Click Install Plugins and click Add New
- Click the Upload Plugin button
- Navigate `extendon_ajax_layered_navigation.zip` on your computer and click Install Now
- When installation is done please click Activate to activate plugin

Installing using FTP

Follow the steps bellow to install using FTP

- Unzip extendon_ajax_layered_navigation.zip to a desired location on your computer. These extracted files will be uploaded later via FTP
- Connect to your server via FTP (Use FileZilla or any other FTP client)
- Navigate to /wp-content/plugins/ server directory
- Locate the local directory where you have unzipped the extendon_ajax_layered_navigation.zip archive
- Upload local folder /extendon_ajax_layered_navigation/ to remote /wp-content/plugins/
- To activate the newly installed plugin navigate to Plugins and click the Activate button within the Extendons Ajax Product Filter

1.2 Plugin Updates

Update from WordPress Admin

Follow the steps bellow to update from WordPress Admin Dashboard

- Navigate to Plugins
- Find the currently installed Extendons Ajax Product Filter plugin and click Deactivate
- After deactivation click Delete to remove the old version (your saved setting will not be lost)
- Click Install Plugins and click Add New
- Click the Upload Plugin button
- Navigate the new version archive extendon_ajax_layered_navigation.zip on your computer and click Install Now
- When installation is done please click Activate to activate plugin

Update using FTP

Follow the steps bellow to update using FTP

- Unzip the new version archive extendon_ajax_layered_navigation.zip to a desired location on your computer. These extracted files will be uploaded later via FTP
- Connect to your server via FTP (Use FileZilla or any other FTP client)
- Navigate to /wp-content/plugins/ server directory and delete the current plugin folder /extendon_ajax_layered_navigation/
- Locate the local directory where you have unzipped the new version archive extendon_ajax_layered_navigation.zip
- Upload local folder /extendon_ajax_layered_navigation/ to remote /wp-content/plugins/

User Guide

After installation of plugin, login to admin panel and flush your cache storage.

2.1 How to Add / Edit Widgets

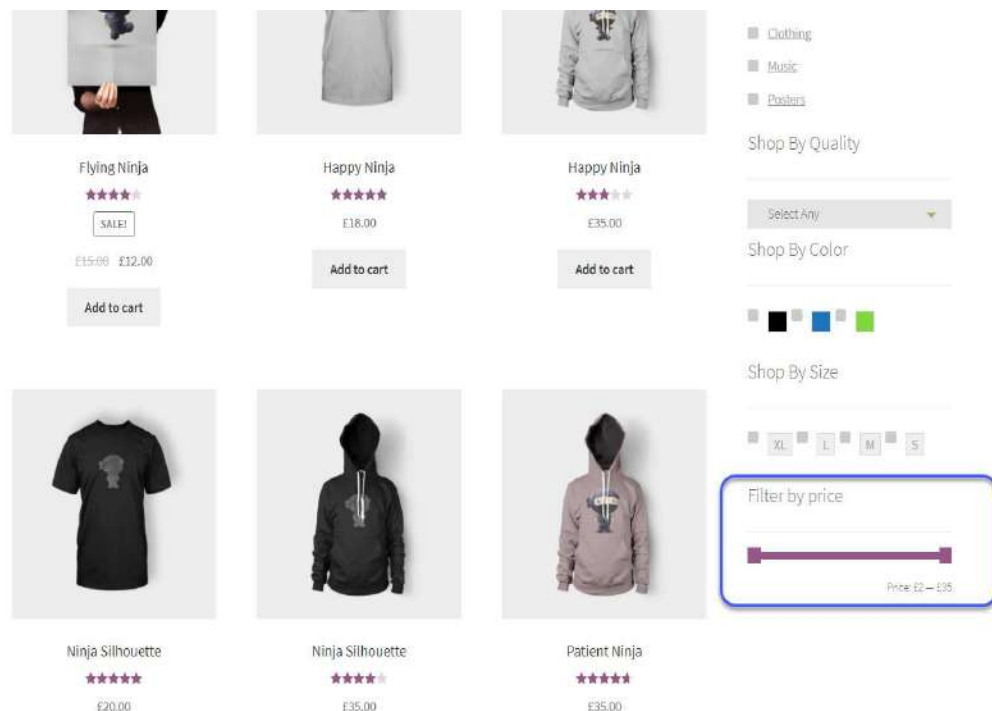

Step 1: Go to Widgets

At the backend, go to Appearance > Widgets. Here you will find all the widgets available for the plugin and the sections where they can be added. For the purpose of this demo we have added “Extendons Price Filter” to the “Sidebar”.

Step 2: Frontend

Now at the frontend you will find your widget in the sidebar highlighted. You can also go back and edit according to your requirements.

2.2 How to Customize Widgets

Step 1: Go to Widgets

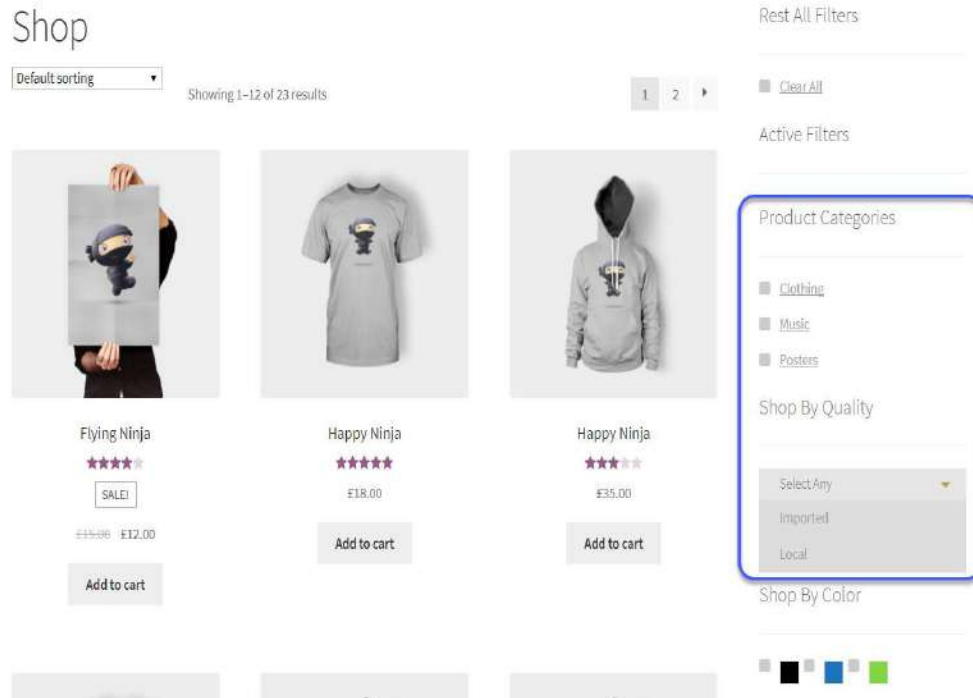

At the backend, go to Appearance > Widgets. Here you will find all the widgets available for the plugin and the sections where they can be added. For the purpose of this demo we provided "(Product Categories)" & "(Attributes)" with the information shown below.

The screenshot displays the WordPress backend interface for configuring widgets. The left sidebar shows the navigation menu with 'Appearance' selected. The main content area shows a grid of widget options. Two widgets are highlighted with blue boxes and dashed arrows pointing to their configuration panels:

- Extensons Layered Nav(Product Category):** This panel includes fields for Title (Product Categories), Order by (Name), and checkboxes for Show product counts, Show hierarchy, Only show children of the current category, and Hide empty categories. A dropdown menu for 'Category order' is shown with 'Name' selected.
- Extensons Layered Nav(Attributte):** This panel includes fields for Title (Shop By Quality), Attribute (quality), Display Type (Select Box), and Query Type (AND). A dropdown menu for 'Display Type' is shown with 'Select Box' selected.

Step 2: Frontend

Now at the frontend you will find your widgets in the sidebar highlighted. You can also go back and edit according to your requirements.

2.3 How to Configure the Plugin

At the backend, go to "Ajax Layered Nav". Here you will find the following settings:

General Settings:

1. **Spinner Background Color:** This is the background color of the spinner
2. **Spinner Forground Color:** This is forground color of the spinner
3. **Background Color:** This is background overlay
4. **Opacity:** Opacity of the background overlay
