

# APPIGATOR USER GUIDE

## INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of [Appigator](#) for Shopify. A step by step instruction has been added to this document to help users to install this app on their Shopify stores.

This app will only work on Shopify. As a safe practice always backup your files and database before installing any app on your store. If you are looking for someone to install this app, we can do it for you as well. Just go to our store page and let our support know the order id to expedite the installation process.

Once it is installed please refer to the User Guide to help you understand how to use this app to its full capacity. If you still have questions, feel free to contact us via email at [info@extendons.com](mailto:info@extendons.com).

## USER GUIDE

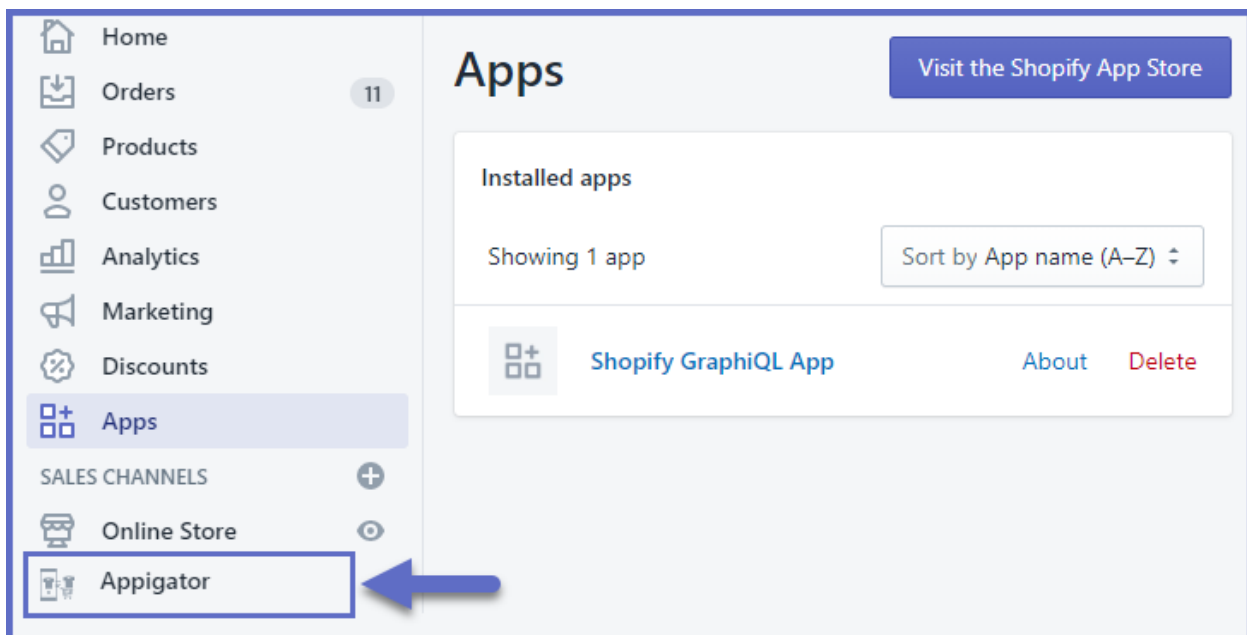

### HOW TO INSTALL THE APPIGATOR APP

First, at the back end, go to the [Apps](#) store. Here you will find the Appigator App. Click on [Appigator](#) and add it to your store after accepting billing. Once installed, the user will be redirected to the app interface.

**Demo Link:** <https://app-builder-demo.myshopify.com/collections/all>

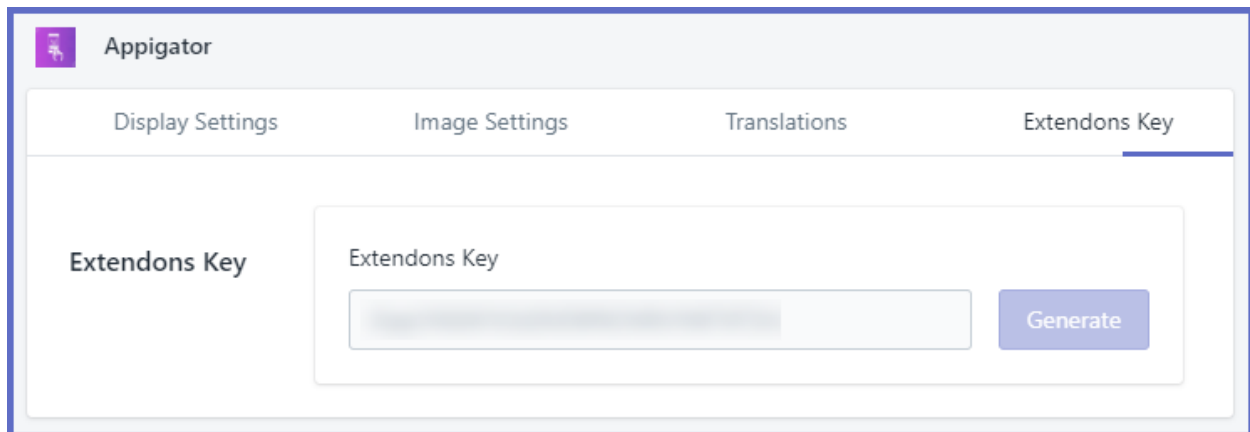

### PRE-REQUISITE FOR CONFIGURATIONS

At the back end, go to [Apps](#) store. Here you will find the Appigator App. Click on [Appigator](#) and then click on the Extendons key tab.

## EXTENDONS KEY

- **Extendons Key:** After configuring and saving all the settings for your mobile app, you will get an Extendons key generated by our app, which you have to share with our support team at [info@extendons.com](mailto:info@extendons.com) and they will get back to you shortly with your mobile builder/appigator app. (**Note:** This key is for the personal use of Extendons)

### FOR iOS APP:

Following things are needed to make a build file for you:

- **Apple Distribution Certificate (.p12)**
- **Apple Development Certificate (.p12)**
- **Provisioning Profiles**

You can make these certificates from <https://developer.apple.com/>

## HOW TO CREATE ANDROID & iPhone APP STORE ACCOUNTS

To create/purchase **Android** & **iPhone** app store accounts, you need to follow the **steps** which are mentioned below:

### FOR GOOGLE PLAY STORE ACCOUNT

#### STEPS:

1. Go to <https://play.google.com/apps/publish/signup/>
2. Click on **Create an Account** button.
3. Fill out the form and click **Next Step**.
4. Click on **Back to Google Play Developer Console**.
5. Select the **Google Play Developer distribution agreement** checkbox to acknowledge your agreement and click **Continue** to payment to pay the one-time \$25 fee.
6. Enter your payment information and click **Accept and Continue**.
7. You will receive an email from Google notifying you when your account is ready to be activated (**Note:** This process can take up the top of a week).
8. Activate your account.

## FOR APPLE APP STORE ACCOUNT

According to Apple, what you need before you enroll is:

- **Enrolling as an Individual**

If you are an individual or sole proprietor/single person business, [sign in](#) with your Apple ID to get started. You'll need to provide basic personal information, including your legal name and address.

- **Enrolling as an Organization**

If you're enrolling your organization, you'll need an [Apple ID](#) as well as the following to get started:

- **A D-U-N-S® Number**

Your organization must have a [D-U-N-S](#) Number so that we can verify your organization's identity and legal entity status. These unique [nine-digit](#) numbers are assigned by [Dun & Bradstreet](#) and are widely used as standard business identifiers. You can check to see if your organization already has a D-U-N-S Number and request one if necessary. They are free in most jurisdictions.

- **Legal Entity Status**

Your organization must be a legal entity so that it can enter into contracts with Apple. We do not accept DBAs, fictitious businesses, trade names, or branches.

- **Legal Binding Authority**

As the person enrolling in your organization in the [Apple Developer Program](#), you must have the legal authority to bind your organization to legal agreements. You must be the organization's owner/founder, executive team member, senior project lead, or have legal authority granted to you by a senior employee.

## STEPS:

1. First, go to <https://developer.apple.com/enroll/> and click on “**Start your Enrollment**”. Sign in using your Apple ID (or create an Apple ID if you do not have one yet).
2. Go over the [Apple Developer Agreement](#), check the box confirming that you have read it, and click on the '**Submit**' button.
3. Confirm that all your information is correct (**email, name, location**), then choose an entity. Please read Apple's explanation of entities below before you make a choice.

**Explanation From Apple:** The Developer name listed on the App Store is based on the type of account selected from the options below. Apps published to Individual Developer Accounts will display the name listed on the [iOS Developer Account](#). Apps published to Company/Organization Developer Accounts will display the Company Name entered within the iOS Developer Account.

## ENTITIES:

- **Individual/Sole Proprietor/Single Person Business:** Individuals or companies without an officially recognized business (company without a Dun and Bradstreet number). This account only allows for a single primary login to be created to the iOS Developer Account.
  - **Company/Organization:** Legally recognized Companies with a Dun and Bradstreet number can select this option. This will allow multiple user logins to be created and managed with varying permissions capabilities for each login. See [here](#) to check if your company is a legally recognized company with a Dun and Bradstreet (DUNS) number.
4. Fill in all the **contact details** for your Developer Account.
  5. Read the [Apple Developer Program License Agreement](#), check the box confirming you have read the agreement and click on the '**Continue**' button.
  6. Confirm that all the previously entered information is correct and click **continue**.

7. Click on '**Purchase**' to enroll and pay for your yearly iOS Developer Account. Don't forget to check the **Automatic Renewal box** if you want your membership to be automatically renewed.
8. Sign in with your Apple ID and fill in your **billing** information. Then click **continue** to complete the setup of your iOS Developer Account.
9. Fill in any remaining information on the following pages. Within **24 hours** you will receive a **confirmation email** from Apple letting you know the setup of your iOS Developer Account was successful.
10. Once your iOS Developer Account is fully set up, enter your iOS developer account information in the **CMS** under **Publish**.

## HOW TO UPLOAD MOBILE APPS ON ANDROID & iPHONE APP STORES

### TO UPLOAD ANDROID APP

After you've signed up for a Google Play developer account, you can **upload** your app to Google Play using your **Play Console**.

- Go to your Play Console: <https://play.google.com/apps/publish/>
- Select **All applications** > **Create application**.
- Select a default **language** and add a **title** for your app. Type the name of your app as you want it to appear on Google Play.
- Create your app's **store listing**, take the **content rating** questionnaire, and set up pricing and distribution.
- Select **Release Management** > **App Releases** > **Create Release** > Upload the build file provided by the Extendons Team.
- Submit your app for review.

## To UPLOAD iOS APP

After you've signed up for an Apple developer account, you can upload your app on the App Store.

- Go to your App store: <https://appstoreconnect.apple.com/login>
- In the App Store Connect dashboard, select **My Apps**.
- Click on the '+' sign in the upper left-hand corner, then click on **New App**.
- To create a new **App Store Connect record**, you'll need these details: platform, app name, default language, bundle ID, and SKU. You can't really change these details later, so be sure of what you enter.
- You need to upload the build file which is provided by the Extendons Team using **Transporter** app i.e.

<https://apps.apple.com/us/app/transporter/id1450874784?mt=12>

- You will select the build file in the App Store Connect dashboard.
- Submit your app for review.

(**Note:** Both Android & iOS apps upload wait time: **2-3** working days)

## HOW TO CONFIGURE THE APPIGATOR APP

At the back end, go to [Apps](#) store. Here you will find the My Store App. Click on [My Store App](#) and you will be directed towards the configurations section.

## HOW TO UNINSTALL THE APPIGATOR APP

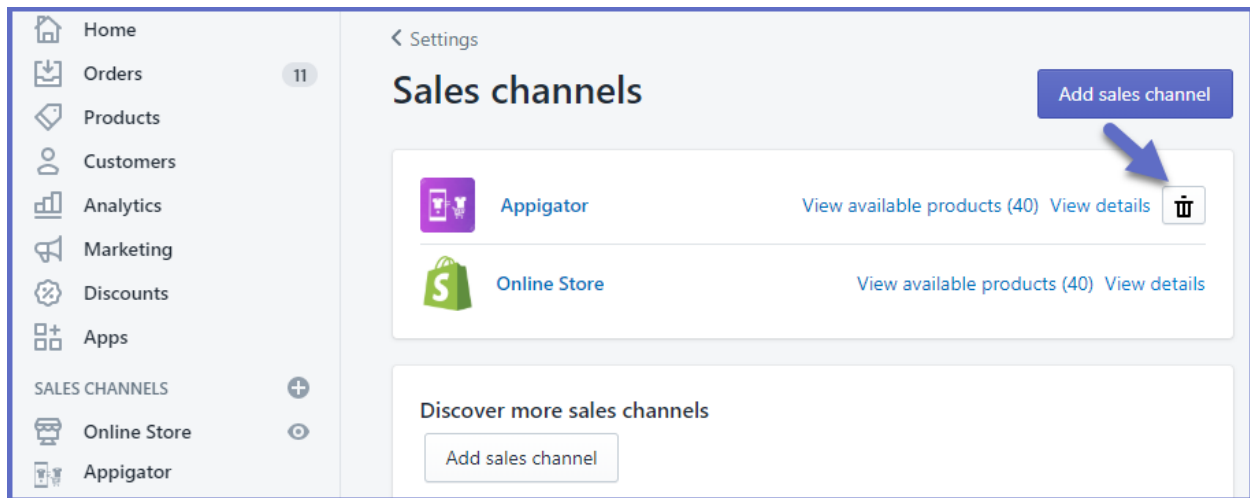

At the back end, go to the [Apps](#) store and click on the [Settings](#) button.

Now click on the [Sales Channel](#) button and a new page will appear at your screen.

Now click on the **Delete** button to remove this app.

## DISCLAIMER

It is highly recommended to back up your server files and database before installing this app.

No responsibility will be taken for any adverse effects occurring during installation.

**It is recommended you install on a test server initially to carry out your own testing.**
