1 Installation Guide

This is a quick guide on installation, and updating.

1.1 Plugin Installation

To install WooCommerce Product plugin you must have a working and latest version of WordPress and WooCommerce plugin already installed. For information on installing the WordPress , please see the [WordPress Codex - Installing WordPress](#). For installing the WooCommerce and configure the shop please visit the following link [WooThemes - Installing WooCommerce](#).

- Now the next step is the WooCommerce Geolocation Plugin - IP Based Products Filter. In the full .ZIP archive you have downloaded from **Codecanyon.net**. This file is the installable .ZIP archive you can install via WordPress.

Now is time to install WooCommerce Geolocation Plugin - IP Based Products Filter, please read these steps carefully.

Installing from WordPress

Follow the steps bellow to install from WordPress Admin Dashboard

- Navigate to Plugins
- Click Install Plugins and click Add New
- Click the Upload Plugin button
- Navigate the .ZIP on your computer and click Install Now
- When installation is done please click Activate to activate plugin

Installing using FTP

Follow the steps bellow to install using FTP

- Unzip the provided .ZIP file to a desired location on your computer. These extracted files will be uploaded later via FTP

- Connect to your server via FTP (Use FileZilla or any other FTP client)
- Navigate to /wp-content/plugins/ server directory
- Locate the local directory where you have unzipped the archive
- Upload local folder to remote /wp-content/plugins/
- To activate the newly installed plugin navigate to Plugins and click the Activate button within the WooCommerce Geolocation Plugin - IP Based Products Filter

1.2 Plugin Updates

Update from WordPress Admin

Follow the steps bellow to update from WordPress Admin Dashboard

- Navigate to Plugins
- Find the currently installed WooCommerce Geolocation Plugin - IP Based Products Filter and click Deactivate
- After deactivation click Delete to remove the old version (your saved setting will not be lost)
- Click Install Plugins and click Add New
- Click the Upload Plugin button
- Navigate the new version archive .ZIP file on your computer and click Install Now
- When installation is done please click Activate to activate plugin

Update using FTP

Follow the steps bellow to update using FTP

- Unzip the new version archive .ZIP file to a desired location on your computer. These extracted files will be uploaded later via FTP
- Connect to your server via FTP (Use FileZilla or any other FTP client)
- Navigate to /wp-content/plugins/ server directory and delete the current plugin folder
- Locate the local directory where you have unzipped the new version archive .ZIP file
- Upload local folder to remote /wp-content/plugins/

2 User Guide

After installation of plugin, login to admin panel and flush your cache storage.

2.1 How to Create Rules

Step 1 - Go to GEO IP Rules at Backend:

At the backend end go to "GEO IP Rules". Here you will find the list of all your rules. "Add New" product or select already existing product to continue.

The screenshot shows the 'GEO IP Ultimate Lock' backend interface. On the left is a dark sidebar with navigation options: Dashboard, Posts, Media, Pages, Comments, GEO IP Ultimate Lock (highlighted), GEO IP Rules, Import GEO Tables, and Support. The main content area is titled 'GEO IP Ultimate Lock' and includes a 'Manage Rules' button and an 'Add New' button. Below this is a table with columns: ID, Rule name, Priority, Status, Date Added, and Actions. One rule is listed with ID 1, Rule name 'Rule For Asia', Priority 1, Status 'Published', and Date Added '2018-05-24 00:00:00'. The Actions column for this rule contains 'Edit | Delete'.

ID	Rule name	Priority	Status	Date Added	Actions
1	Rule For Asia	1	Published	2018-05-24 00:00:00	Edit Delete

Step 2 - Add Rule Information:

Now here you will add your rules information. The options for each tab screenshots are displayed below.

Please Note: Once you select "Block Whole Website" on the Configuration tab the Categories, Products & Pages vanish.

Rule Information:

The screenshot shows the 'Rule Information' tab in the 'GEO IP Ultimate Lock' backend. The sidebar is the same as in the previous screenshot. The main content area has tabs for 'Rule Information', 'Configuration', 'Countries', 'Categories', 'Products', and 'Pages'. The 'Rule Information' tab is active. It contains three main sections: 'Rule Name*' with a text input field containing 'Rule For Europe'; 'Rule Mode*' with a dropdown menu set to 'Display Message'; and 'Rule Message*' with a rich text editor containing the text 'You are not allowed to access this website.' and a 'Save Changes' button at the bottom.

Configuration:

- Dashboard
- Posts
- Media
- Pages
- Comments
- GEO IP Ultimate Lock**
- GEO IP Rules
 - Import GEO Tables
 - Support
- WooCommerce
- Products
- Appearance
 - Plugins
- Users
- Tools
- Settings
- Collapse menu

GEO IP Ultimate Lock

- Rule Information
- Configuration
- Countries
