ADVANCED ORDER QUANTITY

USER GUIDE

EXTENDONS

INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of Advanced Order Quantity App for Shopify. A step by step instruction has been added to this document to help users to install this app on their Shopify stores.

This app will only work on Shopify. As a safe practice always backup your files and database before installing any app on your store. If you are looking for someone to install this app, we can do it for you as well. Just go to our store page and let our support know the order id to expedite the installation process.

Once it is installed please refer to the User Guide to help you understand how to use this app to its full capacity. If you still have questions, feel free to contact us via email at info@extendons.com.

HOW TO CONFIGURE ORDER QUANTITY & AMOUNT FOR CART PAGE

At the back end, go to **Apps** store from the app page as highlighted above on Page#4. Here you will find a **Cart Settings** tab. Click on this tab to continue.

< Cart Settings

Advanced Order Quantity

Add Rule

🔍 Search ID, Rule Title, Status

ID	Rule Title	Product(s)	Status	Action
299	Rule 3	Boho Bangle Bracelet, Brown Throw Pillows,	Enabled	✏️ 🗑️
298	Rule 2	Black Beanbag, Blue Silk Tuxedo, Yellow Sofa,	Enabled	✏️ 🗑️

< >

Here you will find the following configurations:

GENERAL

- **Enable App:** Option to Enable or Disable the Advanced Order Quantity app

CART QUANTITY

- **Minimum Cart Quantity:** Add minimum cart quantity values that must be satisfied by the customer at the checkout page

- **Maximum Cart Quantity:** Add maximum cart quantity values that must be satisfied by the customer at the checkout page

- **Cart Steps/Multiple:** Add steps/multiple for the cart quantity values that must be satisfied by the customer at the checkout page **e.g.** 2,3 and so on. In the case of 2, you can place the order in the multiple of 2 **i.e.** 2,4,6,8, etc. In the case of 3, you can place the order in the multiple of 3 **i.e.** 3,6,9, etc.

- **Cart Quantity Status:** Option to Enable or Disable the minimum/maximum cart quantities

CART AMOUNT

- **Minimum Cart Amount:** Add minimum cart amount values that must be satisfied by the customer at the cart page

- **Maximum Cart Amount:** Add maximum cart amount values that must be satisfied by the customer at the cart page

- **Cart Amount Status:** Option to Enable or Disable the minimum/maximum cart amounts

Now **Save** this information and move to the next tab **Messages**. Here you will have to provide the following information.

MESSAGES

You can use these below **variables** to show a unique message and the app will change these variables to its values.

- **Minimum Order Quantity Message:** Enter an error message for minimum order quantity. To show Minimum Order Quantity in your message you can use this variable in your message **{{minimumOrderQuantity}}**

PUBLISH TO SHOP

- **Rule Category:** Select any one option on which you want to apply the rule. You can either apply the rule on product variants or on the whole collection.

   (**Note:** Rule on single product has preference over the same product in the collection)

   - **Collection**
   - **Product**

If you select "**Product**", then the following field will appear on your screen:

- **Products:** Here you have the option to attach the products on which you want to apply this rule. You are allowed to select multiple products (**Note:** If a product is attached to multiple rules then the rule with the highest priority will be applied)
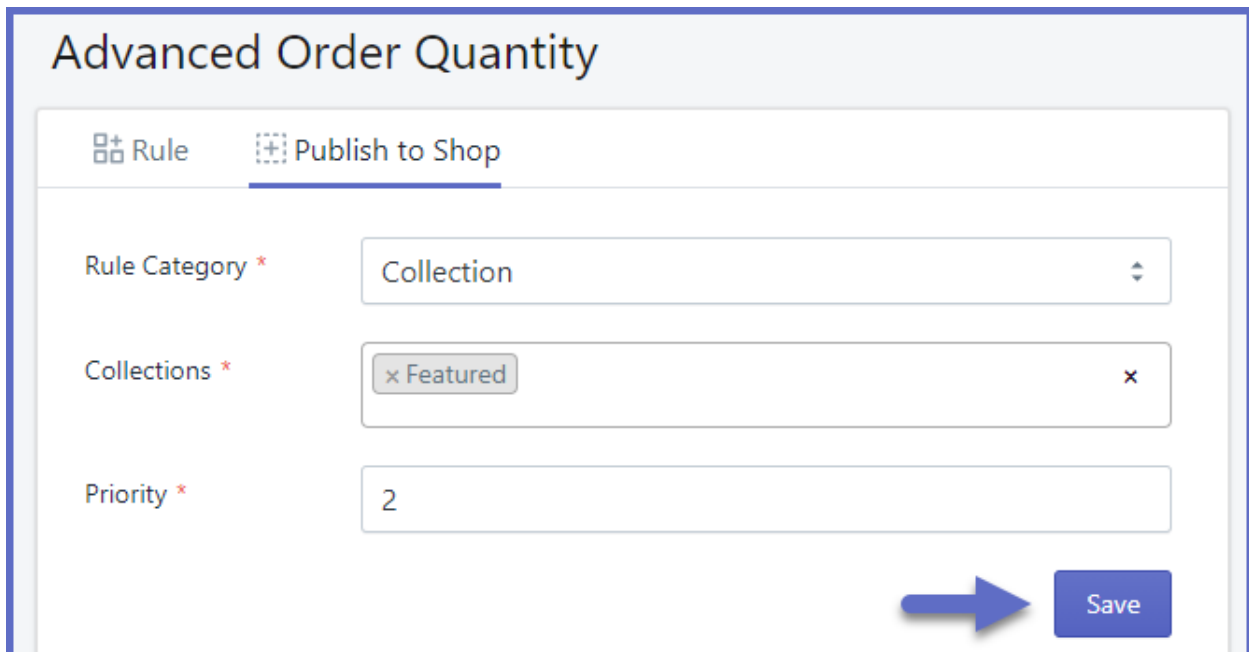

Advanced Order Quantity

⊟ Rule   ⊹ Publish to Shop

| Rule Category * | Product ⇕ |

| Products * | Select Products |

7 Shakra Bracelet

Anchor Bracelet Mens

Antique Drawers

Bangle Bracelet

Biodegradable cardboard pots

If you select "**Collection**", then the following fields will appear on your screen:

- **Collections:** Option to select the categories on which you want to apply the rule **e.g.** Homepage, Sale, Featured, etc.

- **Priority:** Set the priority of the rule for the collection **i.e.** 1,2 etc. The rule will be applied to the collection with the highest priority. '**1**' means '**High**' Priority.

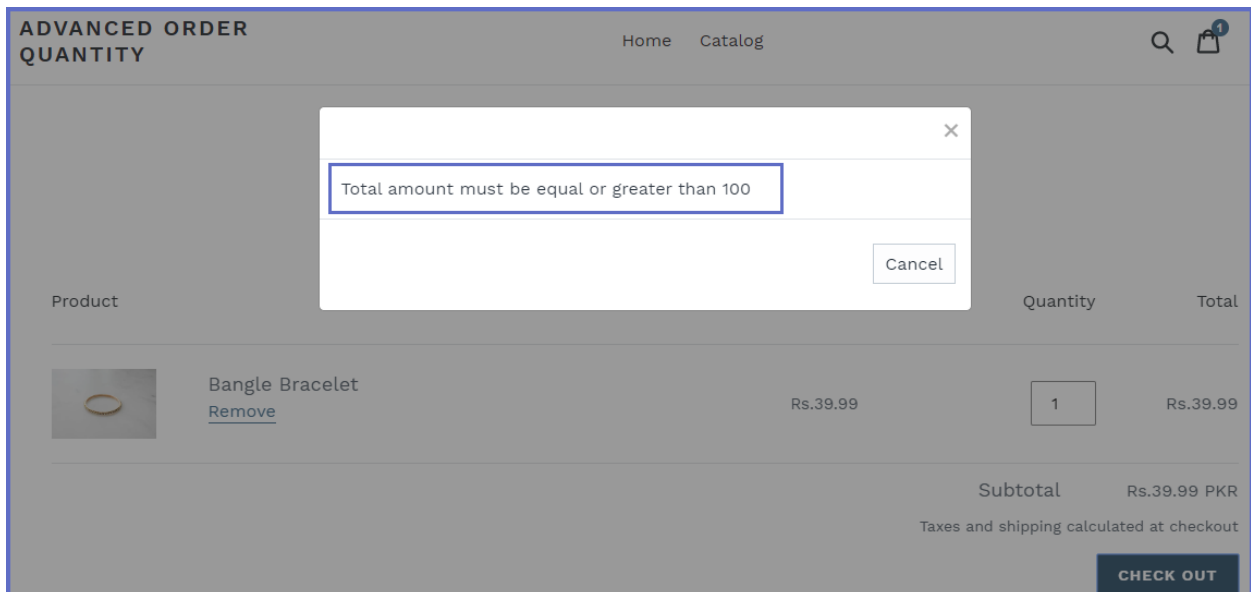

Now **Save** this information to apply the rule on the frontend.
