HOW TO CREATE A PROJECT IN GOOGLE FIREBASE ACCOUNT

Before configuring Extendons OTP Login with Phone app, you must create a project on Google Firebase and enter the project details in the configurations section. To create a project on [Google Firebase](#), you need to follow the [steps](#) which are mentioned below:

STEPS:

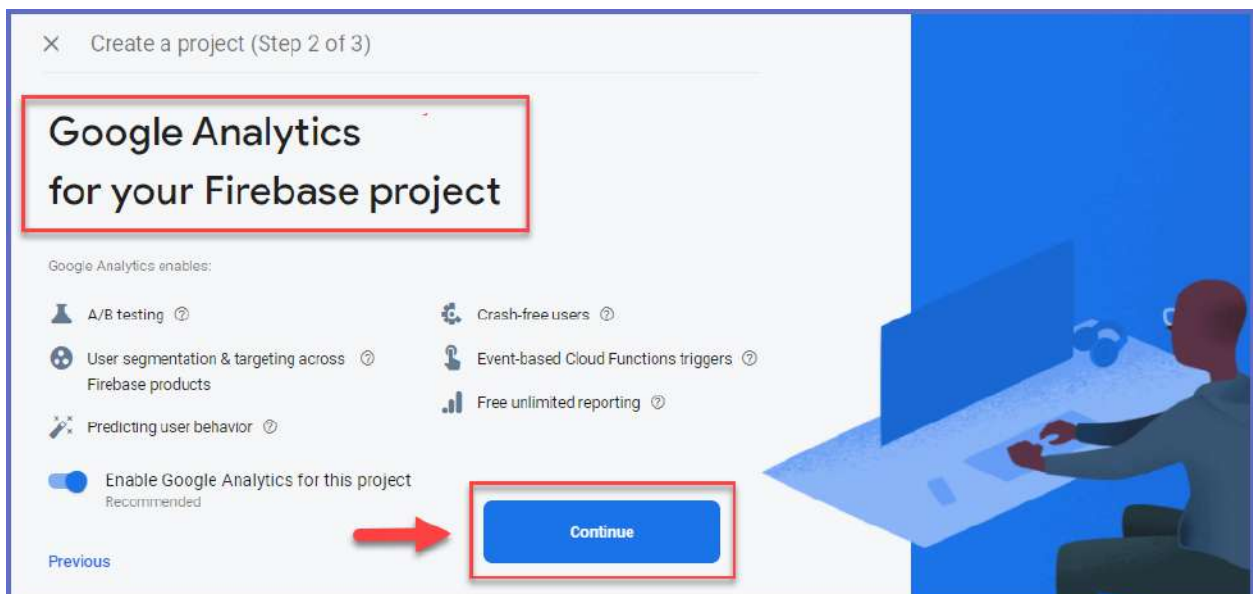

1. Create an Account on Google Firebase and Login.
2. Click on the “[Create a Project](#)” button.

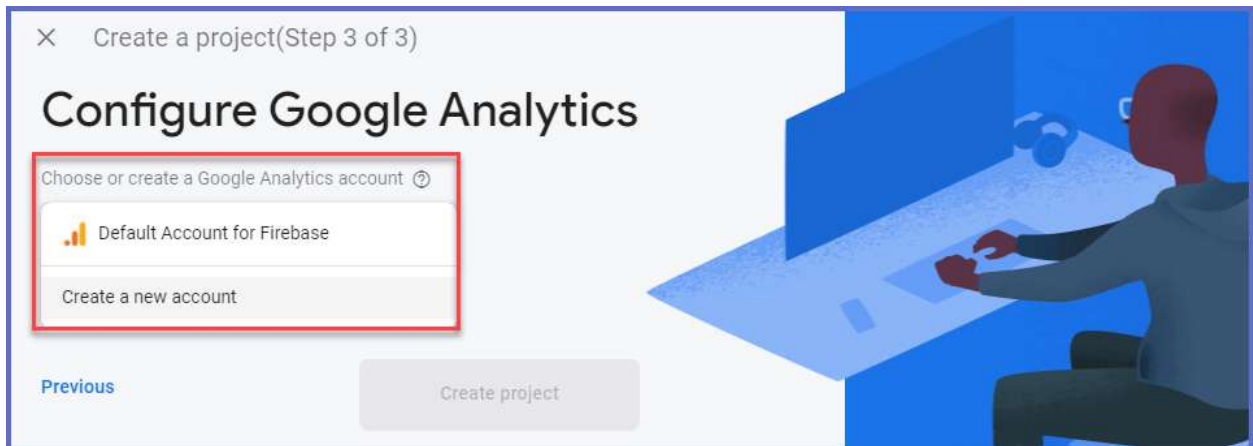

3. Enter a specific project name and click on the “[Continue](#)” button.

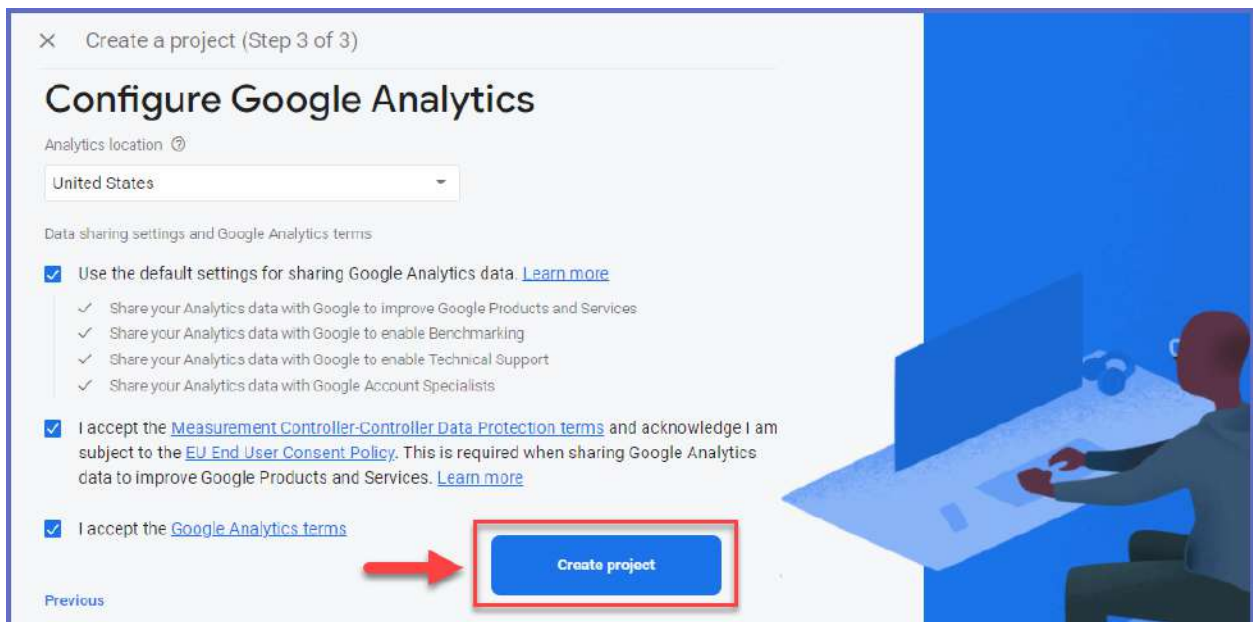

4. Now, again click on the “Continue” button in the Google analytics step.

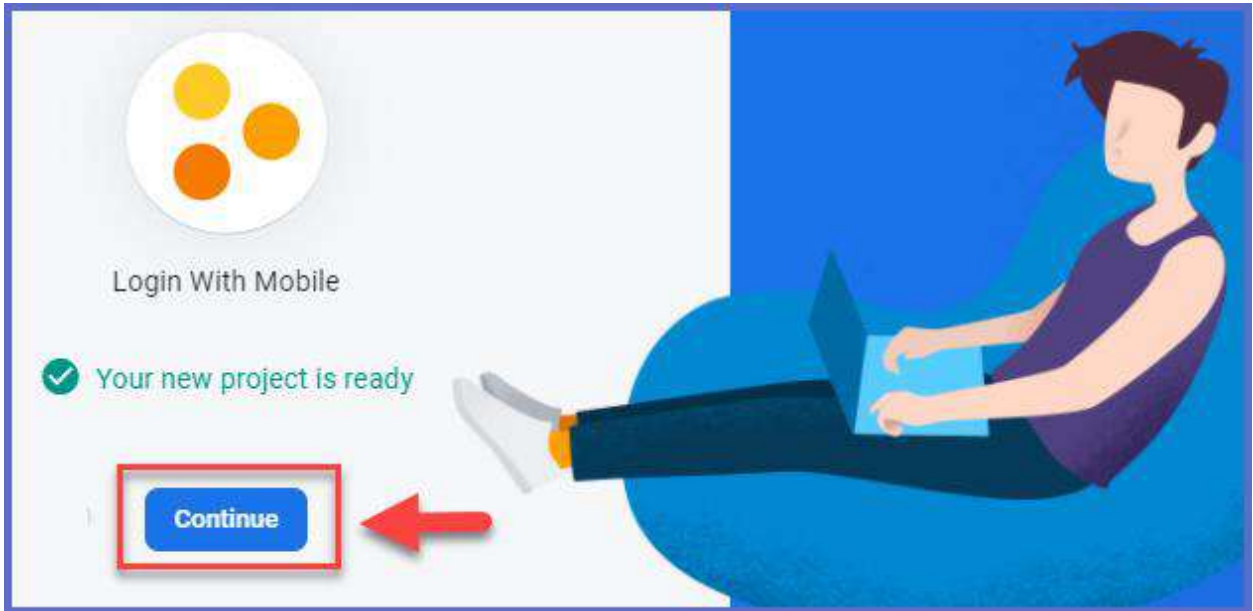

5. Select “Default Account to Firebase” option in the next step and then click on the “Create Project” button (**Note:** Ignore this step if you don’t get this step from Firebase)

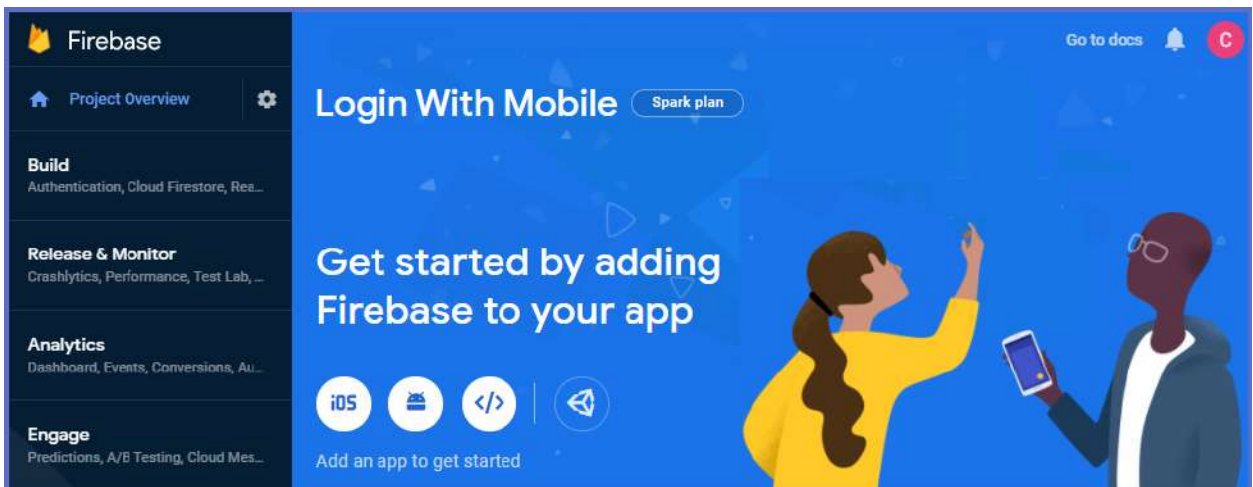

6. Check all the options in “Configure Google Analytics” page and click on the “Create Project” button. (**Note:** Ignore this step if you don't get this step from Firebase)

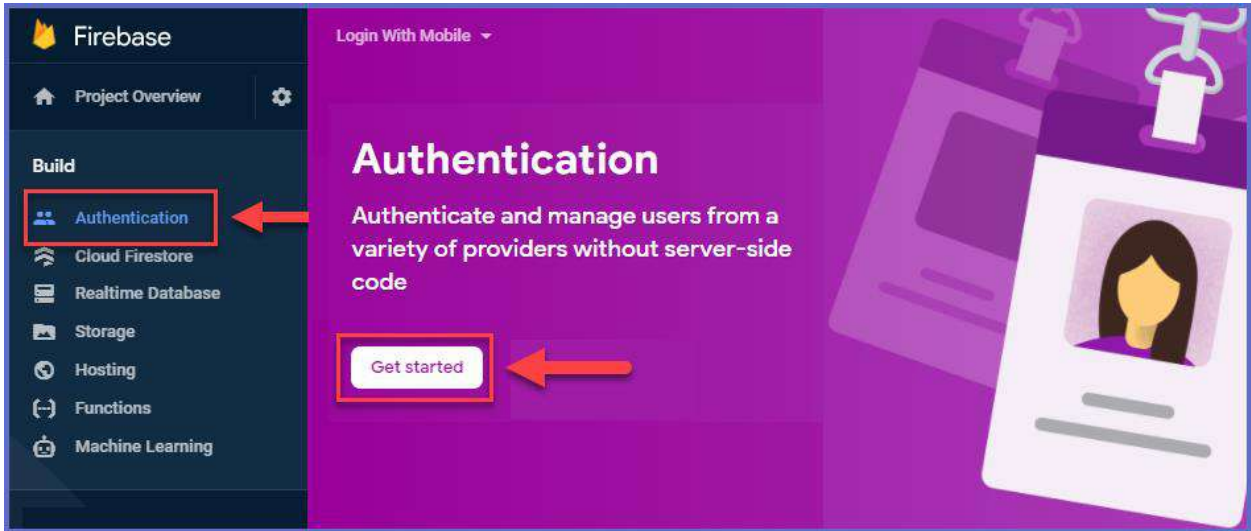

7. Your new project is ready. Press the “Continue” button.

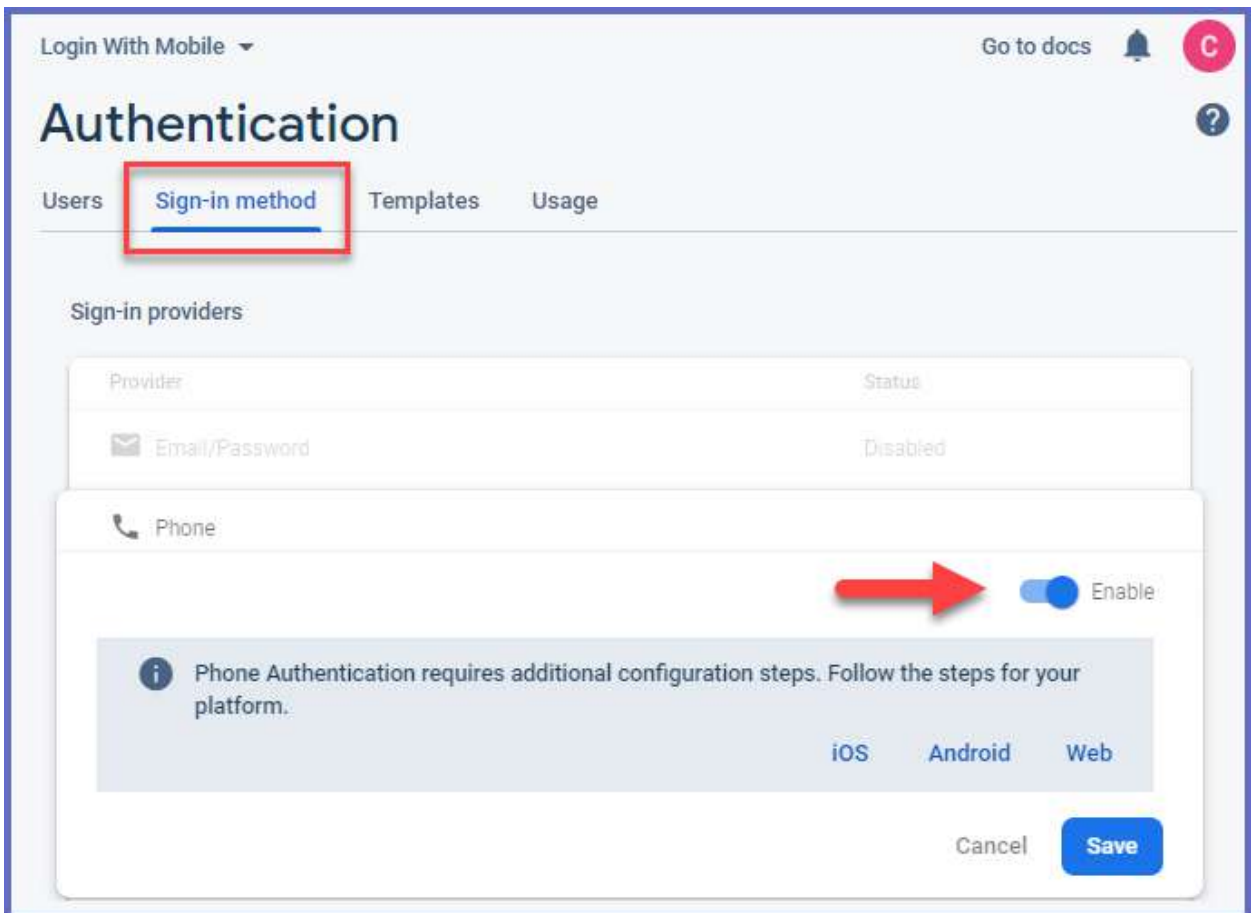

8. Now you can see your project dashboard.

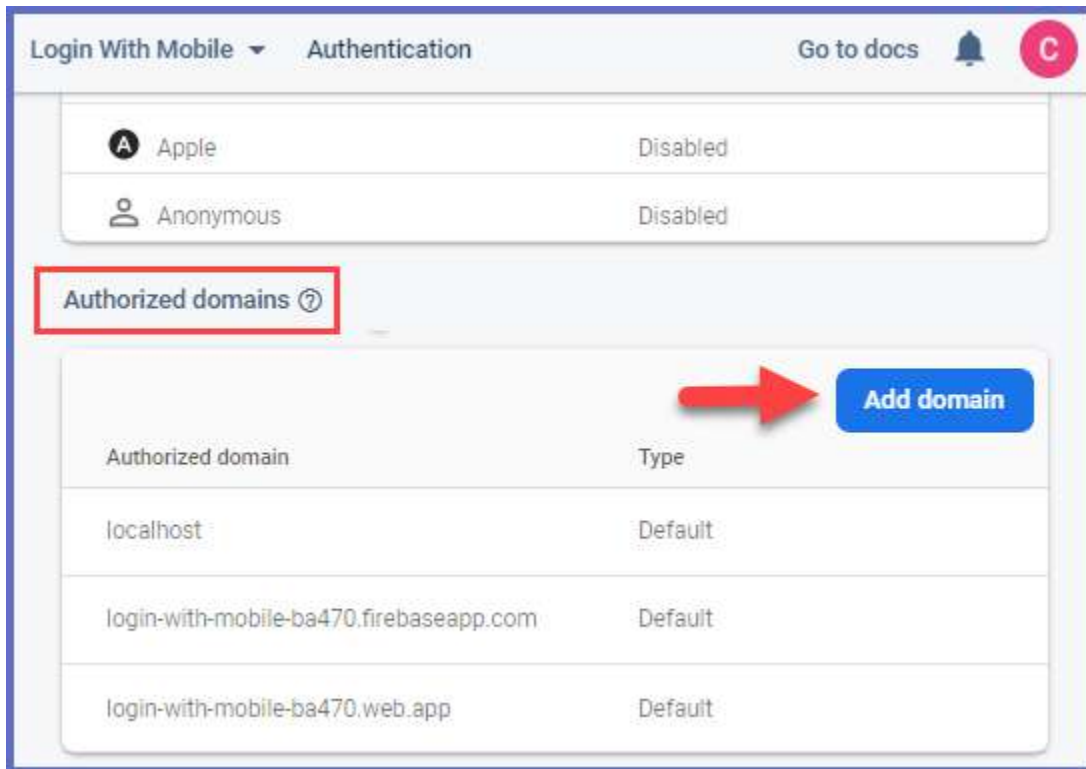

9. Click on the “**Authentication**” button available in the left menu and then press the “**Get Started**” button.

10. Here navigate towards the “[Sign-in Method](#)” tab and enable the “[Phone](#)” option.

11. Now scroll down on the same page and click on the “[Add Domain](#)” button in the [Authorized Domain](#) section.

12. Copy your website URL here and “Save” it by clicking on the “Add” button. Here you can add two web url i.e. your domain name and store name url as well

Login With Mobile Authentication Go to docs

GitHub	Disabled
Yahoo	Disabled
Microsoft	Disabled
Apple	Disabled
Anonymous	Disabled

Authorized domains

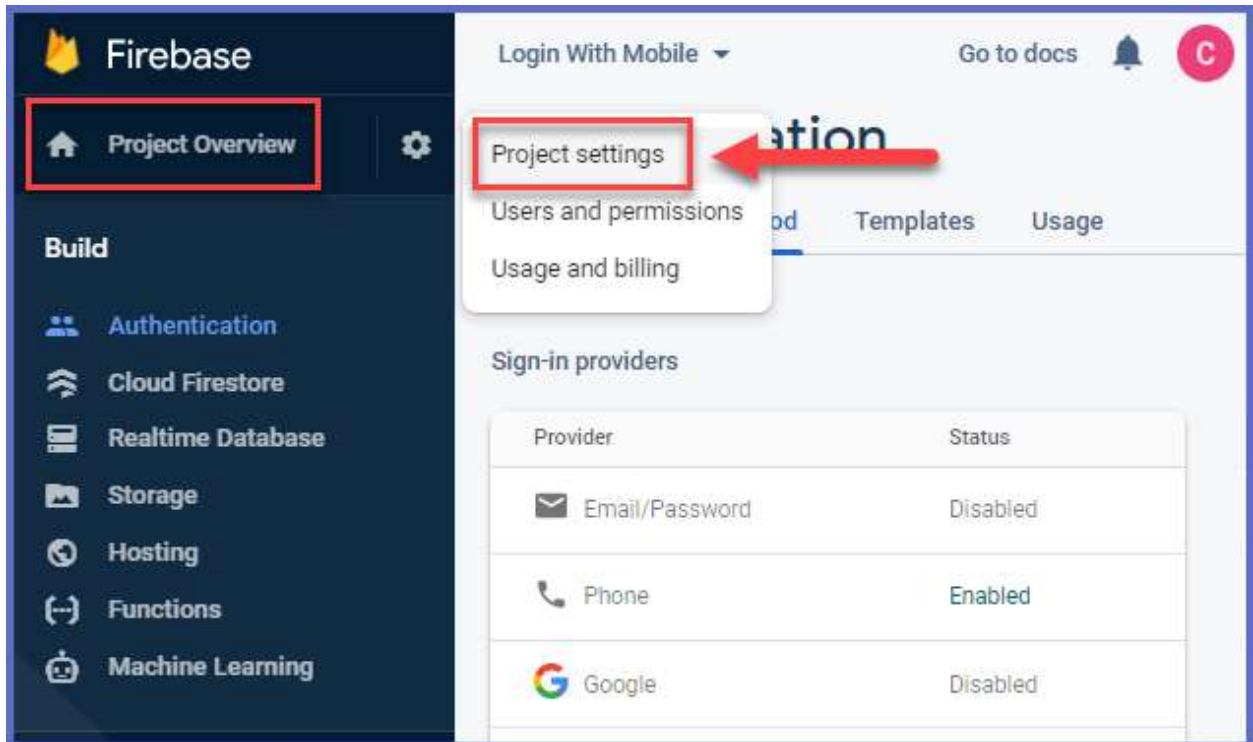

Add domain

Authorized domain	Type
Domain <input type="text" value="www.website.com"/>	
Store Url <input type="text" value="login-with-<u>phone</u>.myshopify.com"/>	

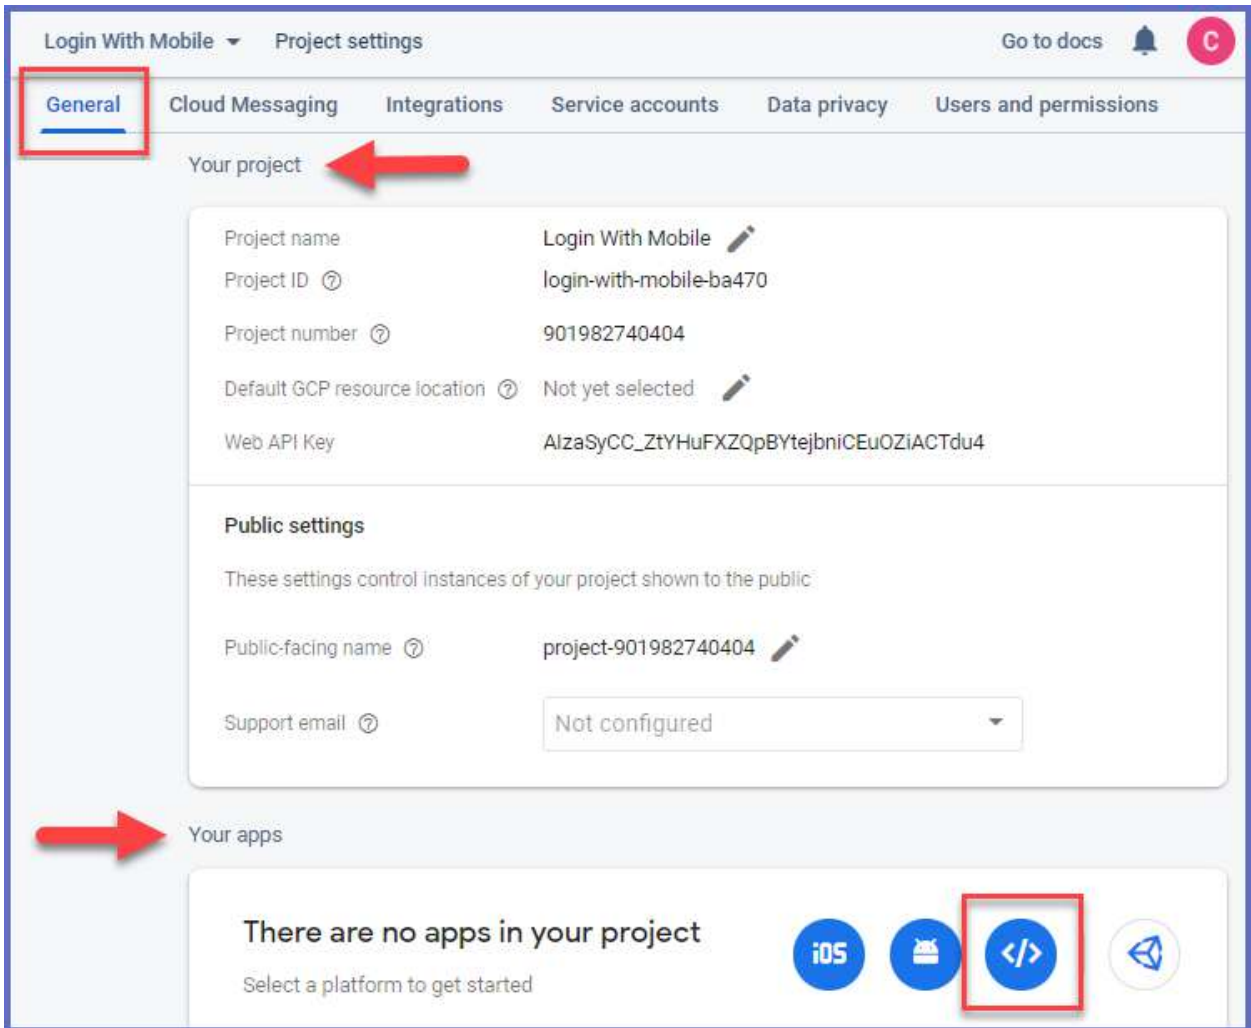

Cancel Add

localhost	Default	
-----------	---------	--

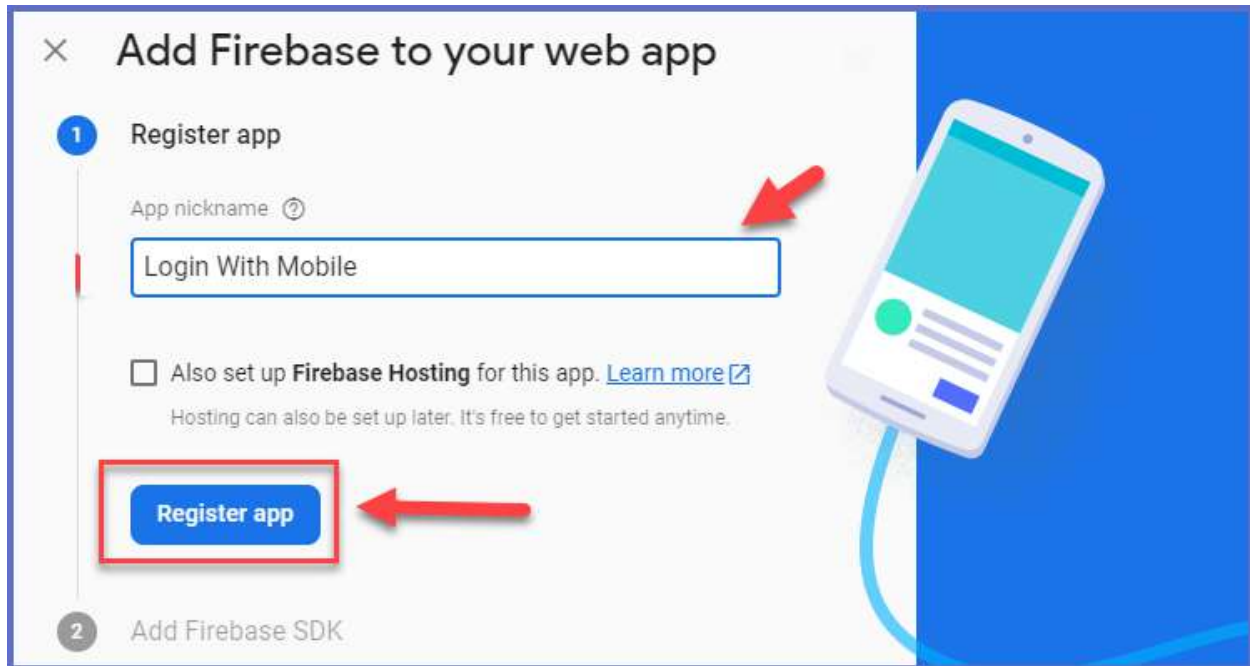

13. Now click on the project settings icon placed after “Project Overview” and choose the “Project Settings” option.

14. In the “General” tab, move down to the “Your Apps” section and click “(</>)” icon to create the app.

15. Select the name for your app and press “[Register App](#)” button.

16. Your app script is ready. Now press the “[Continue to Console](#)” button.

Register app
 Add Firebase SDK

Copy and paste these scripts into the bottom of your `<body>` tag, but before you use any Firebase services:

```

<!-- The core Firebase JS SDK is always required and must be listed first -->
<script src="https://www.gstatic.com/firebasejs/8.2.4/firebase-app.js"></script>
<!-- TODO: Add SDKs for Firebase products that you want to use
https://firebase.google.com/docs/web/setup#available-libraries -->
<script src="https://www.gstatic.com/firebasejs/8.2.4/firebase-analytics.js"></
<script>
// Your web app's Firebase configuration
// For Firebase JS SDK v7.20.0 and later, measurementId is optional
var firebaseConfig = {
  apiKey: "AIzaSyCC_ZtYHuFXZQpBYtejbniCEu0ZiACTdu4",
  authDomain: "login-with-mobile-ba478.firebaseio.com",
  projectId: "login-with-mobile-ba478",
  storageBucket: "login-with-mobile-ba478.appspot.com",
  messagingSenderId: "901982740404",
  appId: "1:901982740404:web:5ed289075492752f7fdoe1",
  measurementId: "G-E4RVTN127E"
};
// Initialize Firebase
firebase.initializeApp(firebaseConfig);
firebase.analytics();
</script>
    
```

Continue to console

17. Now you can see all the needed details in **“Your Apps”** section. Just copy these details in **“Extendons OTP Login with Phone App”** in Shopify.

At the back end, go to the app page. Here you will find the list of all the apps running on your store. Click on the [Extendons OTP Login with Phone](#) app to continue. Here you will find the four types of tabs i.e. settings, firebase, labels & fields, and message.

SETTINGS

Click on the first [settings](#) tab here you can configure the following settings.

- **App Settings:** Option to Enable or Disable the app
- **Login Form:** Option to hide the default login form from store
- **Resend Code Button:** Option to Enable or Disable the resend code button
- **Code Expiration Time:** Option to Enable or Disable and set code expiration time i.e. 1, 2 , 3 ... 60 minutes

EXTENDONS OTP LOGIN WITH PHONE – LOGIN PAGE

The screenshot shows the EXTENDONS website's login interface. At the top, there is a navigation bar with the EXTENDONS logo, links for Home, Catalog, and Contact, and icons for search, user profile, and a shopping bag. Below the navigation bar, there are two input fields for Email and Password. A link for 'Forgot your password?' is positioned below the password field. A black 'Sign in' button is centered below the password field. Below the button is a link for 'Create account'. A red rectangular box highlights a section titled 'Login/Register With Phone Number'. Inside this box, there is a link for 'Associate Email with Phone', a phone number input field with a dropdown for 'PK (+92)' and a text input for 'Enter your phone', and a black 'Send Code' button.

The screenshot shows a web interface for the EXTENDONS application. At the top, there is a navigation bar with the EXTENDONS logo on the left, and links for Home, Catalog, and Contact in the center. On the right side of the navigation bar are icons for search, user profile, and a shopping bag. Below the navigation bar, there is a main content area. This area contains two tabs: "Login/Register With Phone Number" (which is active and highlighted in white) and "Associate Email with Phone" (which is inactive and highlighted in dark grey). Below the tabs, there is a form with three input fields: "Enter Email", "PK (+92)", and "Enter your phone". At the bottom of the form is a black button labeled "Send Code". The entire form area is enclosed in a red border.
